This pdf is provided free of charge. Please feel free to share it at will provided you also do so for free and you keep all the credits intact. It is free because I believe culture should be as widely available as possible. If you enjoy this work, or think it important that I carry on working on projects like this, please donate whatever you can afford/feel is appropriate by Paypal to songsfromtheothersideofthewall@googlemail.com. Or, from April 12th, buy the paperback, details of which are at <http://danholloway.wordpress.com>.

When we tell the story of a relationship, we, and it, are judged by what we omit. By design, by ignorance, or just because there are only so many pages and so much time, the blank spaces tell a story every bit as true, as rich, and as important as the print marks meandering through them. Acknowledging that truth, *Evie and Guy* is the history of a relationship told through the white space of its protagonists' most solitary act. It comprises simply of the dates, times, and duration in seconds (bracketed where the act was interrupted or unclimactic) of every act of masturbation in their lives.

Our lives are so full of joy, despair, individual triumphs and tragedies so vivid they want to scream at the world until they are imprinted there forever in their splendour. But the moment we begin to tell our stories they become trapped in the dullness of a language constructed to reduce our joyful individuality to the whisper of restrained uniformity.

I want to unpick the chains of language that keep each one of our stories prisoner within a patriarchal colonial prison outside of which we cannot conceptualise ourselves until we can conceive and express ourselves in ways that preserve the glorious individuality of each human spirit.

Writing *Evie and Guy*, I wanted my shackles as author, my commentary on Evie's life, to be utterly absent so that her life might have every space it is possible to afford it to speak on its own terms, and might also be lived anew with each reading.

for every Evie

Guy

Acknowledgements

I am not sure how many times a project such as this has been undertaken (Kenneth Goldsmith has done his fair share of transcribings and avant gardisms, but I don't know of anyone who has not only written without words but sought to do so in a way that is not just conceptual but also an attempt to create a genuinely emotionally moving narrative), but it brings its own challenges. Whilst everyone will create Evie's own story anew from these numbers, she has her own story for me, and being faithful to that story has meant I have thumbed and annotated my perpetual calendar to within an inch of its life, so my first thanks are to the website vpcalendars.com. Closely followed by gmarts.com for their invaluable record of the dates of Easter in the 20th century.

The biggest thanks, as always, to my wonderful wife for putting up with my meaningless jabberings about theoretical nonsense that would try the patience of any saint.

I have been writing for as long as I can remember. And in all that time I have wanted to do in literature what my icons like Tracey Emin and Mark Rothko did in art. This is the first time I have felt able to address the full import of that task, and that I felt I could make an attempt at doing it justice, I owe to those who have encouraged me to be myself in my writing, to ignore the path more trodden and believe in the oddness in my head. I couldn't possibly mention everyone who has encouraged me, but specific thanks have to go those who have steered me into and through this book. To Orna Ross, for talking me through some serious moments of confusion. To Dennis Harrison from the Albion Beatnik bookstore for encouraging me not to try to be commercial. To Adelle Stripe for reminding me of the freedom self-publishing gives me and Cally Phillips for reminding me how

important it is not to waste that freedom by trying to do the expected. To Marc Nash and Penny Goring for making me believe that experimentation can also be beautiful. To Katelan Foisy for showing that the most sweeping canvases of all are the minutiae of a single heart. And to Jonny Gibbings for his encouragement and for always leading by example.

Thank you as so many times in the past to the truly brilliant Veronika von Volkova for a cover image so startlingly perfect that not only does it encapsulate everything I want to do with this novel in terms of mystery, nostalgia, loss, longing, desire, strangeness and obsession, but the moment I saw it I felt Evie's eyes looking right into me.

And thank you to the editors and moderators at Jezebel, Clitical, and I Feel Myself for their insights into the so-called norms and the intricate diversities of women's sexuality.
